KEYPLAN

Note:  
 This map shows the potential scale of flood inundation for a severe overtopping flood event and a defined standard of flood defence. It does not include the impact of a breach or failure of these defences.  
 Typical range of defence standards for the Upper and Lower Don is to protect between a 1 in 20year (5%) and a 1 in 100year (1%) return period.  
 s2 = 1 in 2year Standard of Defence  
 q100 = 1 in 100year or 1% probability flood event.  
 This map does not include tidal flooding.  
 This map should be considered in support of the Environment Agency Flood Zone Maps to aid the Sequential and Exception Tests.  
 It should not be considered in isolation without reference to the other SFRA Flood Risk Maps.  
 Please see the Section 3 of the SFRA for further details.
